The shape is similar and the quality is different

The peers have been imitating all the time, but we have never been surpassed.

Similar in shape and different in process

1 Line spray exquisite workmanship

High hardness, high wear resistance

✘ Manual spray, rough technology, easy to fall off the surface.

Similar in shape and different in process

2 Fold able aluminum alloy guardrail

Sturdy, durable, soft treatment

✘ Cheap accessories, easy to break, and have a safety hazard.
